WHY TURKMENISTAN?

Turkmenistan is one of the fastest-growing economies in the world, driven by its vast oil and gas reserves. As one of the world's largest energy exporters, Turkmenistan plays a key role in the global oil and gas market.

The country offers significant opportunities in the oil and gas sector, from exploration and production to refining and petrochemicals. With the Caspian port, Turkmenistan has strengthened its position as the logistics hub for energy exports in Central Asia.

In addition to oil and gas, Turkmenistan provides investment opportunities in related industries such as energy infrastructure, pipeline development, and petrochemical production.
